27th February 2024

Dear Parents/Carers,

The week beginning 11th March is British Science Week, and this year, the theme is 'time'. The theme of time has been selected as it is the 30th anniversary of British Science Week.

Throughout the week, the children's science lessons will be linked to the theme of time. During this week, we are running a competition allowing the children to make connections between their learning in school and their life at home.

For the competition, I would like the children to take a 'Science Selfie'. The selfie needs to be linked to the theme of 'time'.

Some ideas could be:

- Growing something over time;
- Pets that they have had for a long time;
- Older relatives who have experienced more time;
- Timing of races they've done;
- How many _____ they can do in a certain time;
- Pictures of what they think something will look like in the future;
- Comparative photos of something from different years;
- Or... it could be the quickest time to tidy their bedrooms!

This will also be a good opportunity for the children to tell you more about what they are learning in science.

Selfies, along with a sentence about what the selfie is about, can be sent in to office@inglebymill.org.uk before 12:00, Friday 22nd March. Please ensure that your child's name and class are in the subject. Winners will be selected the week beginning 25th March and prizes will be won for the most creative "selfie".

Kind regards,

Mr N. Robinson
